

# Johnny Loco<sup>®</sup>

International lookbook

Johnny Loco strives to make high end products that are built to last. We design and develop our own frames and many of our own bike parts like rims, hubs and fenders. There are no short cuts when it comes to making our bikes. No 'taking the easy way'. There is only the time, the effort and the love that we spend on them before they leave our factory.

When you buy a Johnny Loco bike, you become one of our valued customers, and you will be invited to comment and advise us on our products. With your help, we can build a more satisfactory product in every generation of our bikes.

We hope you find a bike that suits you in our collection and we'd like you to become a member of the Johnny Loco family. If you want to join, but you can't find what you need, please let us know. Maybe we can start your bike together.

A modern city bike, blend of a beach cruiser and a typical Dutch bike, gives you an elegant appearance.

Slightly less jolly than the beach cruiser, and with the 28 Inch wheels a big bike. Are you looking for something in between sporty and relaxed, choose the urban cruiser.

Elegant bike with a range of accessories or even child seats which will suit you, and won't let you down with it's puncture protected tires.

For sure the bicycle, which will be a subtle addition to your unique personality.

## Urban Brighton
